

Task 50.40 pie

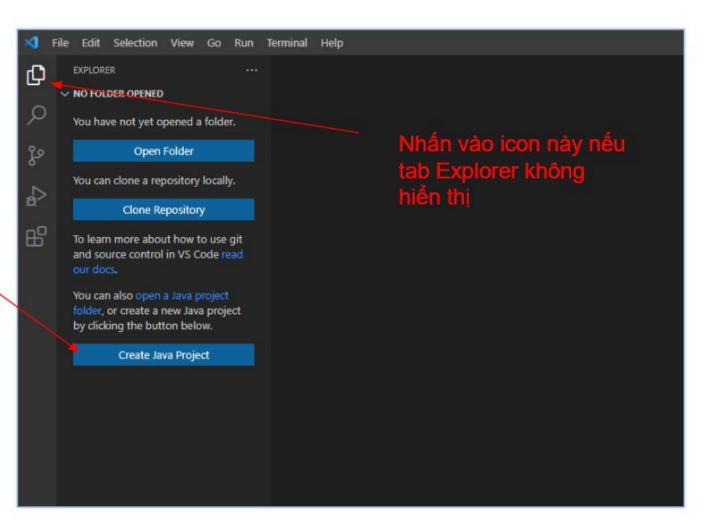

Task 50.40 TDD: Làm quen với package, class

sT	Yêu cầu	Môi trường
1	Tạo package com.devcamp	VsCode
2	Tạo package com.devcamp.j01_javabasic.s40	VsCode
3	Tạo class Voucher trong package com.devcamp.j01_javabasic.s40 với method public static void main(String[] args)	VsCode
4	Tạo method "showVoucher()" với tham số voucherCode. Cho phép in ra nội dụng: "This is voucher code: V0023". trong đó "V0023" lấy từ tham số voucherCode.	VsCode

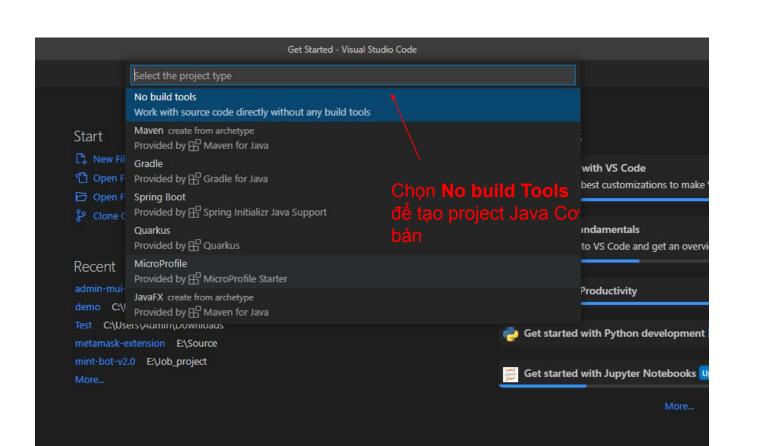

Chú ý, commit và push code lên gitlab của mình sau mỗi subtask

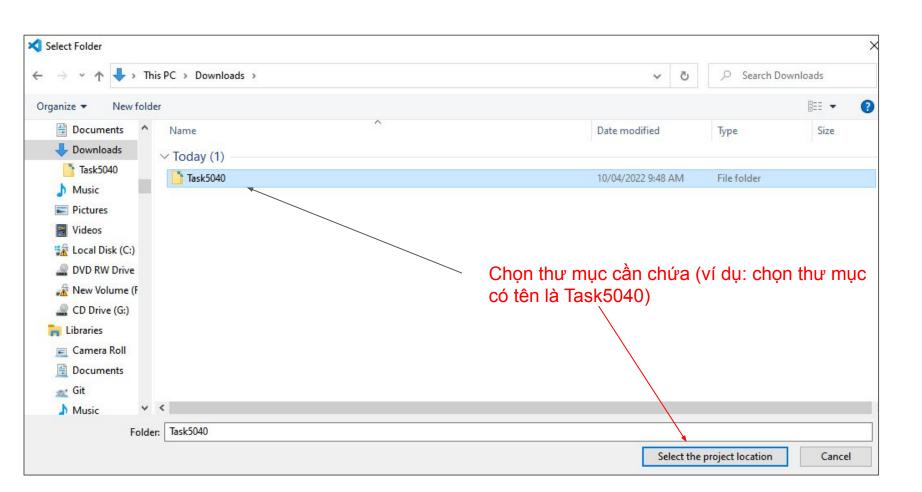

Để tạo một ứng dụng Java cơ bản: Chạy VsCode, mở một cửa sổ mới (File -> New Window) hoặc nhấn tổ hợp phím Ctrl + Shift + N

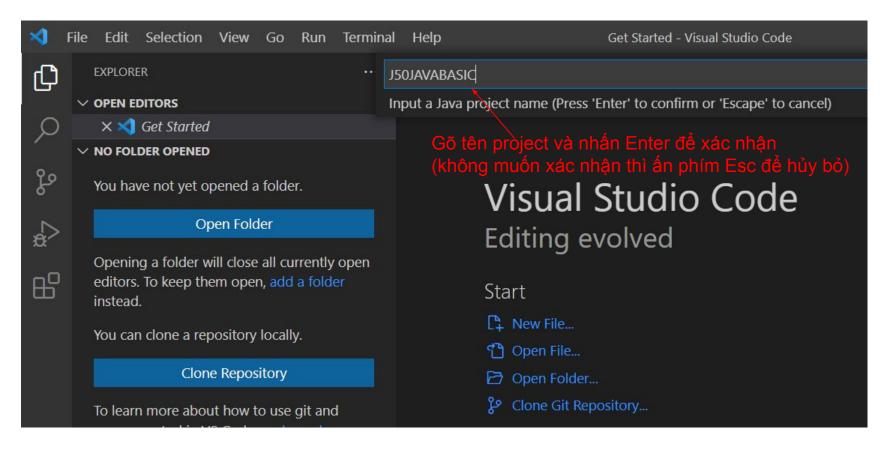

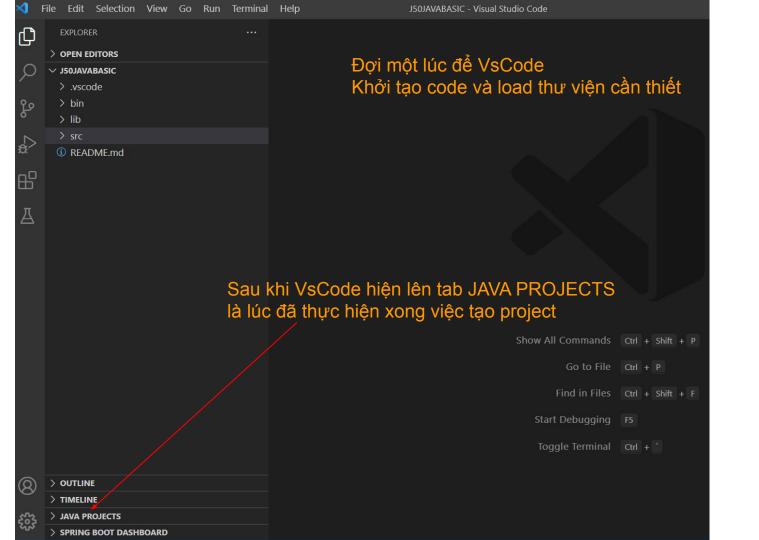

Nhấn để tạo project Java mới

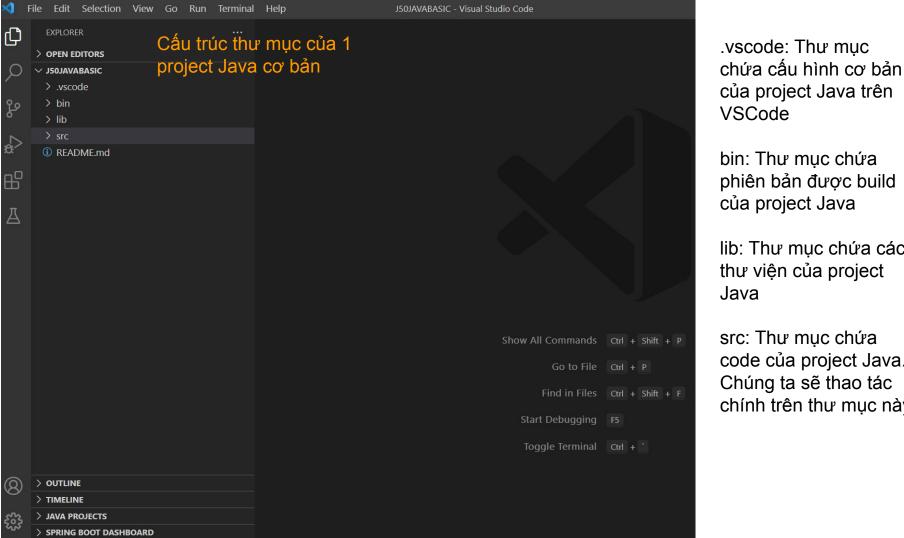

Tạo Java project có tên là: J50JAVABASIC

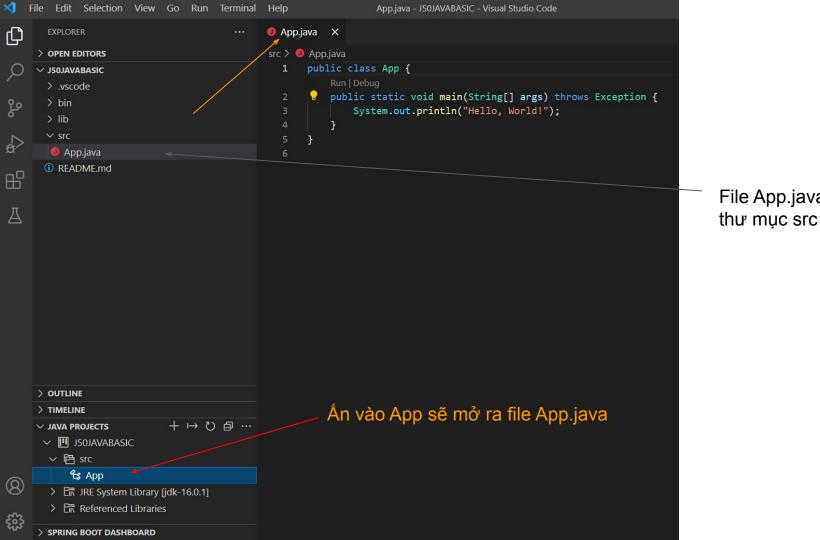

của project Java trên **VSCode**

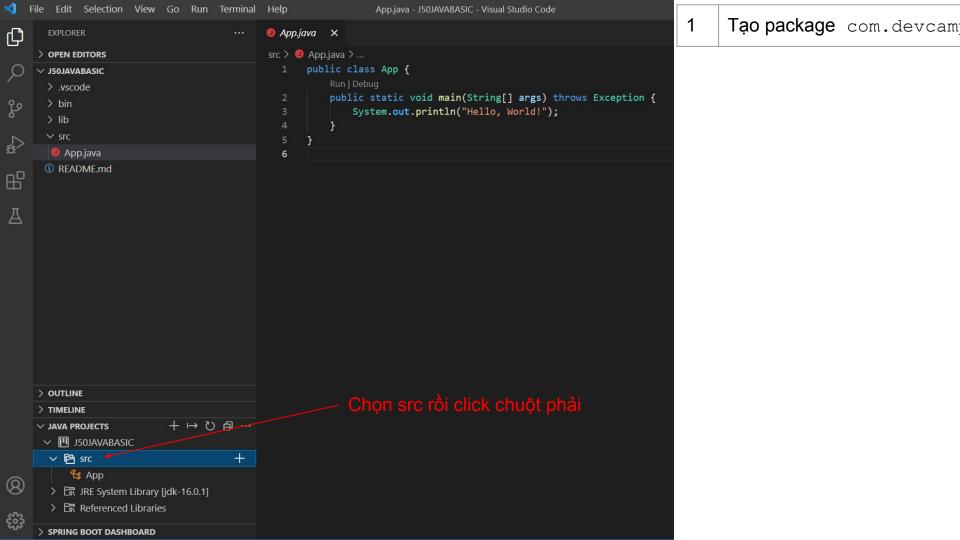

của project Java lib: Thư mục chứa các

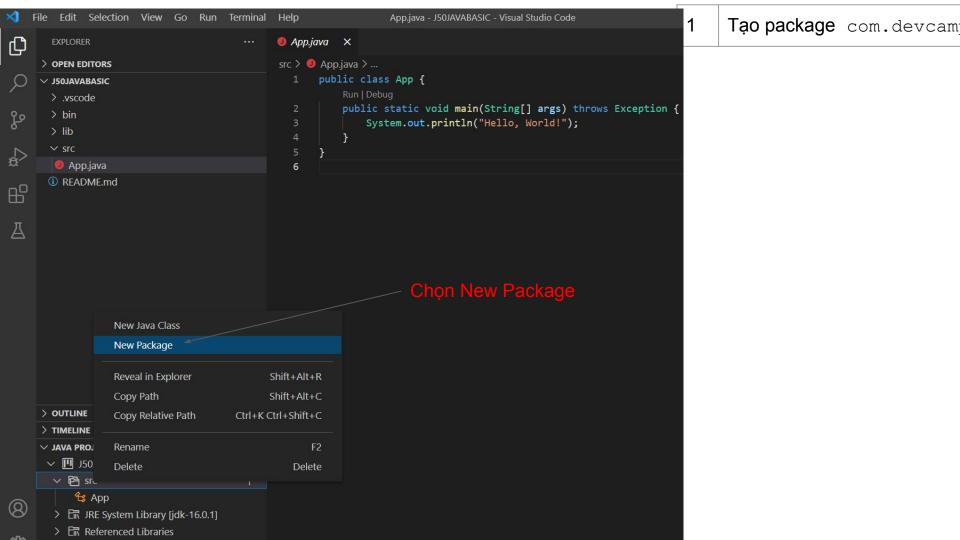

thư viện của project src: Thư mục chứa

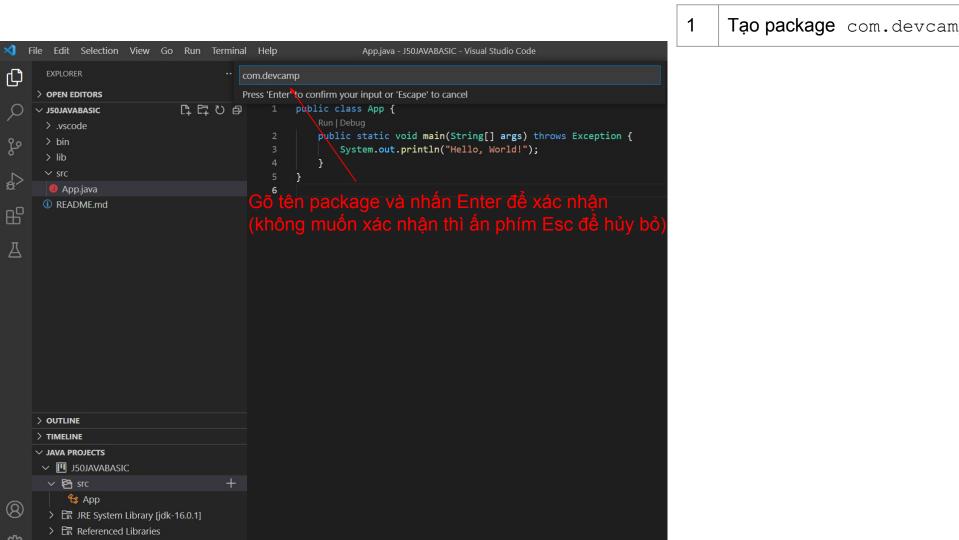

code của project Java. Chúng ta sẽ thao tác chính trên thư mục này

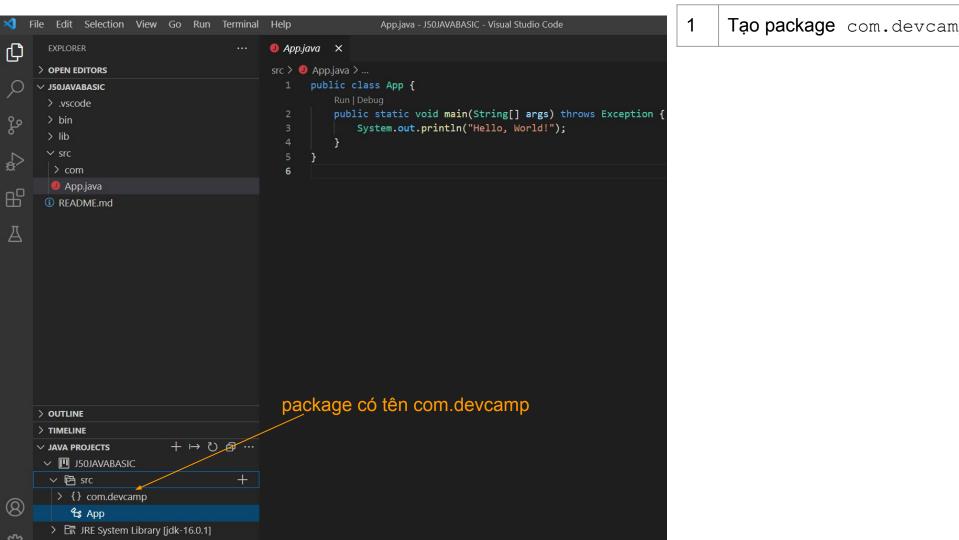

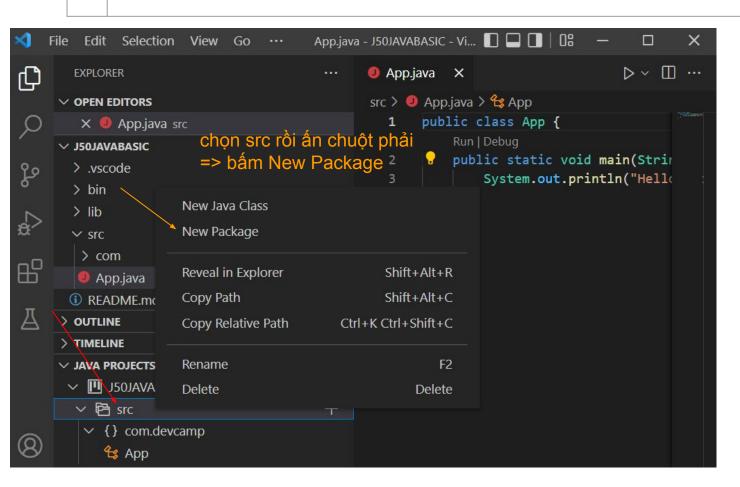

File App.java & trong

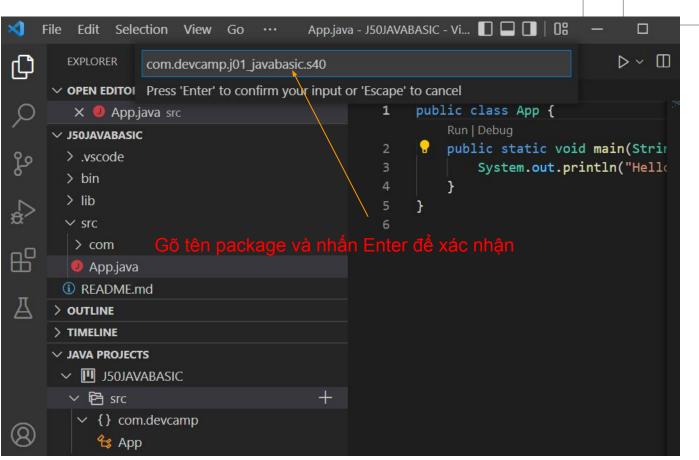

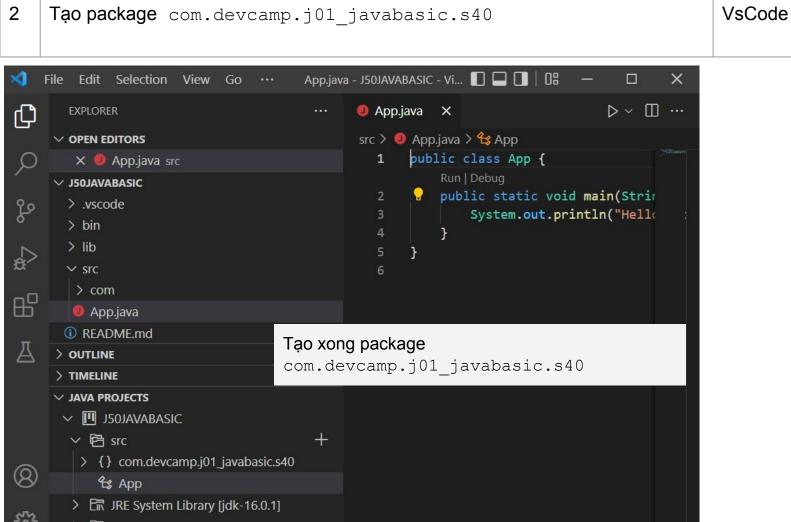

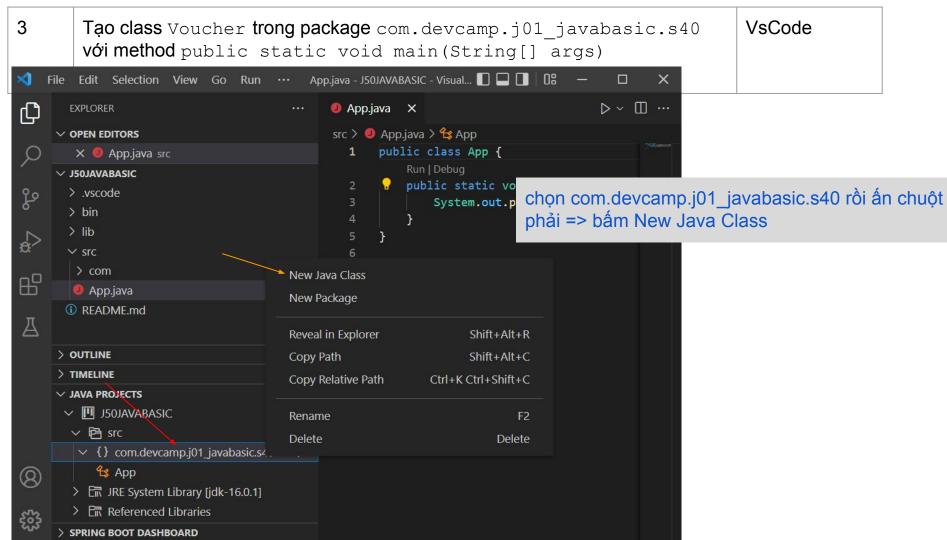

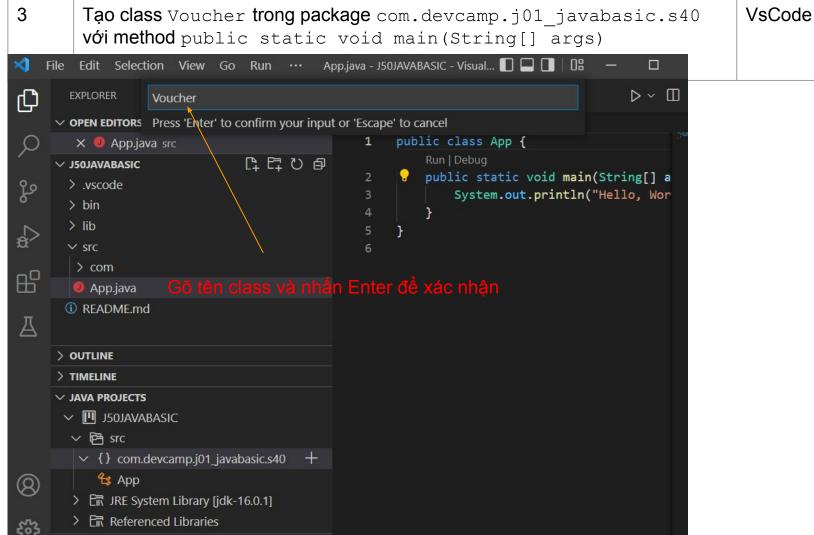

class đã được tao

公 Voucher

4 App

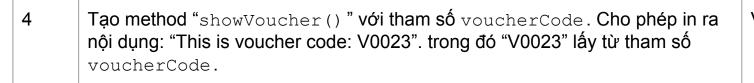

```
với method public static void main (String[] args)
  Voucher.java X
src > com > devcamp > j01 javabasic > s40 > • Voucher.java > • Voucher > • main(String[])
       package com.devcamp.j01_javabasic.s40;
       public class Voucher {
           Run | Debug
           public static void main(String args[]){
```

Tao class Voucher **trong package** com.devcamp.j01 javabasic.s40

VsCode

3

```
Voucher.java X
src > com > devcamp > j01_javabasic > s40 > 9 Voucher java > 4 Voucher
       package com.devcamp.j01_javabasic.s40;
       public class Voucher {
           Run | Debug
           public static void main(String args[]){
           public static void showVoucher(String voucherCode){
               System.out.println("This is voucher code: " + voucherCode);
 10
```

VsCode

```
package com.devcamp.j01 javabasic.s40;
     public class Voucher {
         Run | Debug
         public static void main(String args[]){
             Voucher.showVoucher("V0023");
 5
 6
         public static void showVoucher(String voucherCode){
8
             System.out.println("This is voucher code: " + voucherCode);
10
12
```

```
Voucher.java X
src > com > devcamp > j01_javabasic > s40 > 0 Voucher.java > ...
       package com.devcamp.j01_javabasic.s40;
       public class Voucher {
           public static void main(String args[]){
               Voucher.showVoucher("V0023");
           public static void showVoucher(String voucherCode){
               System.out.println("This is voucher code: " + voucherCode);
 12
